PROFILE

Frontend Engineer specializing in React and TypeScript, with more than four years of experience developing and modernizing enterprise monitoring applications. Proven experience in legacy interface migration, complex state management, and test automation with Cypress, while working with international product, backend, and QA teams.

PROFESSIONAL EXPERIENCE

React/TypeScript Frontend Engineer — Centreon Client Assignment

Marrakech, Morocco | Remote collaboration with product, backend, and QA teams based in France
January 2022 – Present

- Developed and maintained monitoring and configuration interfaces with **React** and **TypeScript** for Centreon MAP and Centreon BAM.
- Migrated **legacy Backbone.js** interfaces to **React** and **TypeScript** while preserving existing business rules and backend integrations.
- Designed reusable UI components and complex forms using **Material UI**, **Formik**, **Yup**, and an internal design system.
- Integrated **REST APIs** and managed complex application state using **React Query** and **Jotai**.
- Developed and maintained nearly 500 **Cypress component tests**, providing regression coverage for critical user journeys across Centreon MAP and Centreon BAM.
- Collaborated remotely with product, backend, frontend, and QA teams based in France in an Agile environment.

Full-Stack Developer — APM Terminals

Tangier, Morocco | Final-year engineering internship
March 2021 – September 2021

- Developed an application for monitoring port equipment using **HTML**, **CSS**, **JavaScript**, and **ASP.NET MVC**.
- Designed the application architecture and **SQL Server database**, then added checklist, inspection, and maintenance modules.

SELECTED PROJECTS

Centreon MAP — Modernization of an Enterprise Monitoring Interface

Enterprise project at Centreon — React, TypeScript, MUI, TanStack Query, Jotai, Rspack, Cypress, draw.io

- Migrated the map viewer and editor from **Backbone.js** to **React** and **TypeScript** across a scope of more than 700 files while preserving business rules and existing backend integrations.
- Developed and integrated **draw.io** as the core graphical editor for Centreon MAP, enabling users to interactively create and edit monitoring maps.

Centreon MAP — Continued

- Redesigned the module's main pages and developed a reusable modal architecture with protection against losing unsaved changes.
- Developed interactive configuration, navigation, and monitoring features using **React Router**, **Visx**, and **Leaflet.js**.

Centreon BAM — Business Activity Simulation and Configuration

Enterprise project at Centreon — React, TypeScript, Visx, Jotai, Formik, Yup, REST APIs

- Developed a simulation panel allowing users to preview configuration changes before applying them.
- Designed an interactive tree-based graphical representation of business activities using **Visx**, making it easier to explore hierarchical relationships and visualize related indicators.
- Developed the indicator listing, a quick-creation workflow, and support for configurable icons.
- Created a reusable component for resetting form fields, integrated with **Formik**.
- Restructured state management with **Jotai** to separate temporary simulation changes from persistent data.

Developer Portfolio

Personal project — Next.js 16, React 19, TypeScript, Zod, Resend, Upstash Redis, REST APIs, accessibility, and SEO

- Designed and developed a bilingual, responsive portfolio featuring project presentations, a secure contact form, and email delivery.

TECHNICAL SKILLS

- **Frontend** - React, TypeScript, JavaScript, HTML5, CSS3, React Router, Backbone.js, Next.js
- **State and data** - React Query, Jotai, REST API
- **Forms and validation** - Formik, Yup
- **UI and data visualization** - Material UI, Centreon UI, Visx, D3.js, Leaflet.js, draw.io
- **Testing and tooling** - Cypress Component Testing, Git, Vite, Docker
- **Backend experience** - ASP.NET MVC, SQL Server, MySQL, Node.js

EDUCATION

Engineering Degree in Computer Science — Information Systems

ENSA Tangier | 2016–2021

CERTIFICATIONS AND TRAINING

- **Epic React — Advanced React 19 Training**, Kent C. Dodds | In progress
- **IBM Cloud Application Developer — Mastery Award** | September 2021

LANGUAGES

- **Arabic**: Native
- **French**: Professional working proficiency
- **English**: Professional working proficiency
